

BMW M5 , 2025

BMW M5 CS Plug-In Hybrid - Marina Bay Blue - 2025

General Overview:

The 2025 BMW M5 CS Plug-In Hybrid, presented in the sophisticated Marina Bay Blue metallic finish, is the ultimate evolution of the high-performance M saloon. As a flagship model from BMW's M division, it delivers a fusion of motorsport DNA, cutting-edge electrification, and refined luxury. The aggressive stance is enhanced by **20-/21-inch M Light 951 M black forged wheels, red M Compound brakes**, and the **M Carbon Exterior Package**, which includes aerodynamic elements crafted from lightweight carbon fiber.

Performance and Powertrain:

At its core, the M5 CS PHEV is powered by a **4.4-liter twin-turbocharged V8** engine coupled with an electric motor, producing a combined output of **717 horsepower** and **1,000 Nm** of torque. Power is distributed through BMW's **M xDrive all-wheel-drive system** and a responsive 8-speed automatic transmission. This setup enables the M5 CS to accelerate from 0 to 100 km/h in **3.5 seconds**, reaching a top speed of **305 km/h** with the **M Driver's Package** installed. Adaptive suspension and the **M Sport differential** further refine its dynamic handling, both on track and on open roads.

Hybrid Efficiency and Battery:

This M5 CS is not only fast but also impressively efficient, featuring a **22.1 kWh** battery (with **18.6 kWh usable**) that provides up to **68 km** of pure electric range. It supports AC fast charging and, in plug-in hybrid mode, achieves a combined fuel consumption as low as **1.6 L/100 km**—making it ideal for both high-performance driving and low-emission commuting.

Interior and Features:

Inside, the car boasts **Merino leather upholstery in Red-Black, carbon fiber trim**, and **M multifunction bucket seats** for all passengers. The **Comfort Package** ensures luxurious travel, while technology highlights include BMW's **Live Cockpit Professional** with a **head-up display**, fully digital gauges, and hybrid powertrain monitoring. Additional features include a **panoramic glass roof, Bowers & Wilkins Surround Sound System**, wireless charging, and multi-zone climate control for a premium in-cabin experience.

Dimensions and Practicality:

Despite its supercar performance, the M5 CS remains practical. It comfortably seats

five, offers a **466-liter** luggage capacity, and has a **60-liter** fuel tank. With a **wheelbase of 3,006 mm**, it provides ample space in the rear, while a **ground clearance of 115 mm** and **adaptive suspension** ensure a composed, performance-focused ride. The **Dark Silver M interior trim with high-gloss silver threads** rounds out a unique balance of aggression and elegance.

Specifications:

ID: DMK-175

Final Price: 169000.00 EUR
