

Ferrari Roma , 2024

Ferrari Roma F1 DCT - 01/2024

General Overview:

The 2024 Ferrari Roma embodies the essence of La Nuova Dolce Vita — a refined grand tourer that fuses timeless Italian elegance with modern high-performance engineering. Finished in the bold and captivating **Rosso Mugello** exterior color, this Roma stands out with a striking presence. The two-tone interior adds another layer of exclusivity and sophistication, perfectly matching the car's luxurious yet athletic character.

Performance and Handling:

Under the hood, the Roma is powered by a front-mid-mounted **3.9-liter** twin-turbocharged V8 engine that delivers an exhilarating **620 horsepower** and 760 Nm of torque. Mated to an 8-speed F1 dual-clutch transmission derived from the SF90 Stradale, the Roma achieves 0 to 100 km/h in just 3.4 seconds. The rear-wheel-drive layout ensures exceptional weight distribution and dynamic responsiveness, making it as enjoyable on winding roads as it is on long stretches of highway.

Interior and Features:

Inside, the Roma offers a luxurious and driver-oriented cockpit, finished in a bespoke two-tone leather configuration. The minimalist dash design features a fully digital 16-inch instrument cluster and an 8.4-inch vertical touchscreen for media, climate, and vehicle settings. The optional passenger display allows the co-driver to view speed, navigation, and performance data. High-quality materials, contrast stitching, and ambient lighting emphasize the bespoke Italian craftsmanship Ferrari is known for.

Exterior Design:

The Roma's exterior is defined by its sculpted silhouette, clean lines, and flowing proportions that recall classic Ferrari GT models. Signature elements include a flush front grille, slender LED headlights, and a retractable rear spoiler that automatically adjusts for aerodynamic performance. The **Rosso Mugello** paint highlights every curve and angle of the body, while flush door handles and sleek detailing maintain a futuristic aesthetic.

Safety and Driver Assistance:

The Roma is equipped with a suite of advanced driver assistance technologies, including adaptive cruise control, lane departure warning, and traffic sign recognition. A comprehensive set of airbags, stability control systems, front and rear parking

sensors, and a rearview camera enhance safety and driving confidence in a wide range of conditions.
