

Ferrari 296 GTS , 2023

Ferrari 296 GTS Spider F1 DCT - 03/2023

General Overview:

The 2023 Ferrari 296 GTS is the open-top expression of Ferrari's revolutionary plug-in hybrid lineup, combining thrilling performance with the elegance of a retractable hardtop. Dressed in **Rosso Imola pearlescent** with a **two-tone exterior**, this convertible delivers all the signature emotion of a mid-engined Ferrari with open-air excitement. Enhanced by a wealth of **carbon fibre upgrades** and tailored details, the 296 GTS blends luxury, precision, and unmistakable Italian style.

Performance and Handling:

Beneath the sculpted lines of the 296 GTS lies a **3.0-liter** twin-turbocharged V6 engine paired with an electric motor, generating a breathtaking total of **819 horsepower**. Mated to an F1 8-speed dual-clutch transmission, it launches from 0 to 100 km/h in just 2.9 seconds. The **Fiorano Performance Pack Extended** sharpens dynamics through revised suspension geometry, performance tyres, and additional carbon enhancements. With **Magnaride adaptive dampers**, **carbon-ceramic brakes (CCM)**, and Ferrari's electronic side slip control (**eSSC**), the car feels equally at home on a twisting road or racetrack. It rides on a mix of **forged painted and diamond 20-inch alloy wheels**, secured with **titanium bolts** and accented by **black brake calipers**.

Interior and Features:

The cockpit is all about immersive driving. It features **carbon fibre racing seats**, a **carbon fibre dashboard**, **instrument cluster**, and a **steering wheel with integrated shift lights**. The seats are ventilated, fully electric, and adjustable for ideal comfort and support. Embroidered Ferrari logos, a **carbon fibre trunk base**, and **carbon fibre tunnel trim** elevate the bespoke interior. Technology highlights include a digital cluster, wireless **Apple CarPlay**, **Bluetooth audio streaming**, **DAB digital radio**, and a **wireless charging pad**.

Exterior Design:

The retractable hardtop opens in just 14 seconds, seamlessly transforming the silhouette while maintaining the coupe's purity of form. Aerodynamic details such as the **carbon fibre rear diffuser**, **underdoor panels**, and **wheels** reduce drag and enhance high-speed stability. The **two-tone paint scheme** in **Rosso Imola** further highlights the curves and aggression of this hybrid supercar.

Safety and Assistance Systems:

Safety and convenience are ensured with **ABS Evo, electronic stability and traction controls, tyre pressure and temperature monitoring**, front and rear **parking sensors**, a **rearview camera**, and multiple airbags. **Keyless entry and start**, along with the sophisticated vehicle dynamic systems, offer full confidence whether cruising or pushing the limits.
