

Lamborghini Huracan , 2022

Lamborghini Huracán EVO RWD (LDF) - 10/2022

General Overview:

The 2022 Lamborghini Huracán EVO RWD, finished in elegant **Grigio Hati (Grey)**, offers a purist approach to supercar performance by focusing on rear-wheel-drive dynamics. The EVO RWD is a celebration of Lamborghini's raw driving pleasure, delivering thrilling handling characteristics and a more intimate connection between driver, car, and road. With its aggressive styling and pure V10 soundtrack, this Huracán stands as one of the most engaging models in the lineup.

Performance and Handling:

At the heart of the Huracán EVO RWD lies a naturally aspirated **5.2-liter V10** engine, producing an exhilarating **610 horsepower** and **560 Nm** of torque. Power is transmitted to the rear wheels through a 7-speed Lamborghini Doppia Frizione (LDF) dual-clutch transmission, enabling lightning-fast gear changes. The EVO RWD accelerates from 0 to 100 km/h in just 3.3 seconds, offering a top speed of over 325 km/h. Thanks to a re-engineered Performance Traction Control System (P-TCS) and lighter overall weight compared to AWD versions, this model offers sharper, more responsive handling and a playful, driver-centric character.

Interior and Features:

The cockpit is designed to place the driver at the center of the experience. Premium materials such as Alcantara and leather are combined with Lamborghini's signature hexagonal motifs and Y-themed design elements. The 8.4-inch touchscreen integrates navigation, media, and vehicle settings, while Apple CarPlay ensures smartphone connectivity. Lightweight sport seats, a fully digital instrument cluster, and optional carbon-fiber interior accents enhance the Huracán's focused yet luxurious atmosphere.

Safety and Driver Assistance Systems:

Although engineered for driving purity, the Huracán EVO RWD includes essential safety features such as ABS, traction control, stability control, and multiple airbags. An optional rearview camera and parking sensors make daily maneuvering more practical, while advanced traction management ensures optimal grip and performance even during spirited driving.

Exterior Design:

The design remains unmistakably Lamborghini: sharp, angular, and aerodynamically sculpted. The RWD-specific front splitter and rear diffuser distinguish it from AWD

models, optimizing airflow and downforce. Riding on lightweight alloy wheels and fitted with signature LED lighting, the Grigio Hati paintwork accentuates the aggressive yet refined lines of the Huracán EVO, ensuring a commanding presence wherever it goes.

Specifications:

ID: ULL-314

Final Price: 305000.00 EUR
