## MINI Cooper S 3-door DCT Favoured Trim - 01/2025

### General Overview:

The 2025 MINI Cooper S 3-door in **Icy Sunshine Blue** is a charismatic blend of retro charm and cutting-edge technology, designed for those who seek a spirited driving experience with unmistakable style. This "Favoured" trim enhances the Cooper S's already premium appeal with refined exterior accents, exclusive trim details, and added comfort-focused features that elevate the everyday drive.

### Performance and Handling:

Under the hood, the MINI Cooper S is powered by a **2.0-liter** turbocharged 4-cylinder petrol engine, producing **204 horsepower**. Paired with a slick 7-speed dual-clutch transmission (DCT), it delivers punchy acceleration, agile handling, and responsive steering—hallmarks of the MINI go-kart-like feel. The front-wheel-drive layout combined with a low center of gravity ensures precise cornering and excellent road feedback.

### Interior and Features:

Inside, the cabin features premium upholstery and ambient lighting, with a modern dashboard layout centered around a large OLED circular infotainment display. The Favoured trim adds premium materials and personalized design elements, including contrast stitching and upgraded trim inserts. A newly updated MINI Operating System powers the interface, offering seamless smartphone integration via Apple CarPlay and Android Auto, navigation, and voice control.

### Comfort and Practicality:

Despite its compact dimensions, the MINI Cooper S 3-door offers supportive seating for four, with well-bolstered front sport seats and a rear bench suitable for occasional passengers or extra luggage. The boot offers flexible cargo options, especially with the rear seats folded down. Features such as dual-zone climate control, keyless entry, and a high-resolution digital driver's display contribute to everyday usability.

### Exterior Design:

The Icy Sunshine Blue finish adds a vibrant, modern flair, complemented by Favoured trim accents such as a contrasting roof color, refined chrome detailing, and stylish alloy wheels. LED matrix headlights, redesigned taillights, and sleek body lines give the car a distinctive, sporty presence on the road.
