Nissan Leaf , 2021

Nissan Leaf XV Selection – 08/2021

General Overview

The **Nissan Leaf XV Selection** is an advanced electric hatchback that blends innovative technology, everyday practicality, and eco-friendly performance. Finished in a striking **Garnet Red with Super Black roof (CP two-tone finish)**, this model stands out with a dynamic appearance and a focus on sustainable mobility. With features such as **ProPilot Assist, Blind Spot Monitoring (BSM), and Emergency Braking**, it delivers both modern safety and effortless driving convenience.

Performance and Driving Dynamics

Powered by a fully electric drivetrain, the Leaf provides smooth, quiet, and instant torque delivery, making it highly responsive in urban and highway conditions. The integration of **adaptive cruise control, lane keep assist, anti-skid systems, obstacle sensors, and automatic high beam assist** ensures confident handling and maximum driver support in all conditions. Its efficient design prioritizes range and reliability, making it a strong choice for daily use.

Interior and Comfort

Inside, the Leaf combines functionality with comfort. Features include **keyless entry, smart key system, power windows, heated seats, and genuine leather upholstery** that elevate the cabin's refinement. The thoughtful layout ensures both driver and passengers enjoy a premium electric driving experience with ample comfort and convenience.

Technology and Safety

Safety and driver assistance are at the core of this Leaf, with systems such as **multiple airbags, ProPilot Assist, blind spot monitoring, collision mitigation braking, adaptive cruise control, and all-around cameras**. Anti-theft devices and stability control further enhance security. This blend of intelligent safety features ensures that the Leaf provides peace of mind on every journey.
