

Porsche 911 , 2023

Porsche 911 Dakar PDK 4WD - 11/2023

General Overview:

The 2023 Porsche 911 Dakar is a rare and exhilarating reinterpretation of the iconic 911, designed specifically for high-performance adventure beyond traditional roads. Finished in a unique **Rallye Design Package in White/Gentian Blue Metallic**, it features extensive lightweight construction, Dakar-specific bodywork, and a raised suspension, creating a rally-ready supercar like no other. Limited in production, it pays tribute to Porsche's rallying legacy, notably the 1984 Paris-Dakar Rally.

Performance and Handling:

At its heart, the 911 Dakar houses a **3.0-liter twin-turbocharged flat-six engine**, producing **473 horsepower** and **570 Nm** of torque. Paired with Porsche's legendary PDK dual-clutch 8-speed transmission and an intelligent all-wheel-drive system, it rockets from 0 to 100 km/h in just 3.4 seconds. The car features a Rallye Sport Package with a road-legal fire extinguisher, a lifted suspension system (+50mm), rear-axle steering, and the Porsche Dynamic Chassis Control (PDCC) for enhanced off-road and on-road dynamics. Porsche Traction Management (PTM) ensures optimized grip across surfaces, while selectable driving modes include specific Rallye and Off-Road settings.

Interior and Features:

The cabin is a masterclass in sporty minimalism and bespoke design. Race-Tex upholstery, carbon-fiber trim, and full bucket seats create a motorsport-inspired atmosphere. Highlights include the Extended Rallye Design Package, RaceTex-Leather black seat covers with perforated Race-Tex centers and Shark Blue contrasting stitching, and a multifunction GT Sport steering wheel with Shadegreen stitching. The Porsche Communication Management (PCM) system offers navigation, BOSE Surround Sound System, Apple CarPlay/Android Auto integration, and digital displays. A white rev counter and Sport Chrono Stopwatch Instrument Dial in white accentuate the rally spirit.

Exterior and Design:

The 911 Dakar boasts a rally-inspired exterior, featuring lightweight components like the **carbon-fiber reinforced plastic (CFRP) front trunk lid and fixed rear spoiler**. It is equipped with **19-inch front and 20-inch rear Dakar-specific satin black alloy wheels**, a stainless steel-protected front and rear apron, side skirts with stainless steel inlays, and a roof electrification system with an external power

connection. Sports tailpipes in silver, black high-gloss side window trims, and LED Matrix headlights with Porsche Dynamic Light System Plus (PDLS+) complete the bold and rugged exterior.

Safety and Assistance Systems:

The Dakar is equipped with a comprehensive array of safety technologies: ParkAssist system with Surround View, adaptive cruise control, lane keep assist, ABS with extended brake functions, Porsche Stability Management (PSM), Tire Pressure Monitoring System (TPMS), multiple airbags, and a rearview camera. Unique safety additions include a Rallye Sport Package featuring a fire extinguisher for motorsport compliance and preparation for a Porsche Dashcam.
