Tesla Model 3 Long Range - 03/2021

Exterior

This **Tesla Model 3 Long Range** is finished in **black**, presenting a sleek and modern appearance. The elegant silhouette is complemented by a **glass panoramic roof** and **19-inch alloy wheels**, enhancing both aesthetics and aerodynamics. Its coupe-like body design ensures a premium road presence.

Performance and Driving Dynamics

Powered by **dual electric motors** and equipped with **all-wheel drive (AWD)**, the Long Range version delivers about **441 horsepower**. The setup provides exceptional acceleration, with 0–100 km/h in around **4.4 seconds**, while maintaining outstanding stability and control in all weather conditions. A large-capacity battery ensures long-distance capability, making it ideal for both city use and extended trips.

Interior and Comfort

Inside, the cabin offers **premium black leather seats** with **power adjustment** and **seat heaters**, ensuring both driver and passenger comfort. The **spacious interior** seats five passengers, while the minimalistic dashboard with a large central touchscreen defines Tesla's modern design. The **power tailgate** adds convenience for everyday use.

Technology and Safety

This Model 3 Long Range comes with Tesla's advanced **Autopilot system**, including adaptive cruise control, lane keeping, and collision avoidance. Safety is supported by **multiple airbags, ABS, stability control, obstacle sensors, and a rear-view camera**. Additional features include **Bluetooth, navigation, and a premium audio system**.
