## Tesla Model 3 Standard Range Plus - 07/2021

### Exterior

The Tesla Model 3 Standard Range Plus is finished in **Pearl White**, highlighting its sleek, modern electric sedan design. With clean lines, flush door handles, and aerodynamic proportions, the Model 3 combines elegance with efficiency. LED headlights and a distinctive glass roof add to its futuristic appeal.

### Performance and Driving Dynamics

Powered by an **all-electric motor with rear-wheel drive (RWD)**, the Model 3 Standard Range Plus offers responsive acceleration and smooth performance, **283 horsepower**. Delivering instant torque and excellent efficiency, it balances city commuting with highway driving range. The advanced chassis and low center of gravity, thanks to the floor-mounted battery, ensure stable handling and confident cornering.

### Interior and Comfort

The cabin is designed with a minimalist yet premium approach, featuring seating for **5 passengers**. It includes **power-adjustable seats**, premium upholstery, and a panoramic glass roof that enhances the feeling of spaciousness. The driver-focused environment integrates a large central touchscreen, which controls most of the car's functions, ensuring a futuristic and clutter-free design.

### Technology and Safety

This Model 3 is equipped with **advanced driver-assistance systems**, including Autopilot features such as adaptive cruise control, lane keeping, and collision mitigation. Safety is reinforced with **multiple airbags, ABS, stability control, and a rear-view camera**. Additional highlights include **Bluetooth connectivity, smart key access, and premium audio integration**. Tesla's over-the-air software updates ensure the car continuously improves in both performance and features.
