

Toyota Yaris , 2023

Toyota Yaris X 1.5L 4WD - 2023

General Overview

The 2023 **Toyota Yaris X 1.5L 4WD** offers a perfect blend of compact agility, intelligent engineering, and safety-oriented design. Designed for the Japanese domestic market, this model combines practicality with driving confidence — ideal for city streets as well as light off-road or slippery conditions. Finished with full equipment, it reflects Toyota's focus on reliability and innovation in a modern hatchback form.

Performance and Drivetrain

Powered by a **1.5-liter petrol engine (M15A-FKS)**, the Yaris delivers smooth and efficient performance while maintaining excellent fuel economy. The **Dynamic Torque Control 4WD** system provides automatic, on-demand traction: under normal conditions, the vehicle runs as front-wheel drive for efficiency, while the rear wheels engage instantly when slip or loss of grip is detected. Above approximately 70 km/h, the system typically disengages the rear axle to optimize fuel use, while **Snow Mode** pre-locks the clutch for added stability on slippery roads.

Interior and Comfort

Inside, the Yaris X 4WD provides comfort and technology well beyond its class. The cabin features high-quality materials, ergonomic seating, and advanced multimedia integration for daily convenience. The compact body ensures excellent maneuverability, while the raised stability from the 4WD system adds confidence during adverse weather or uneven terrain.

Ownership and Warranty

The price includes a **full inspection at our certified service center, first service free of charge**, and a **warranty on the engine and gearbox**. Also included are **registration under the first owner's name in Cyprus, license plates**, and **road tax**.

Specifications:

ID: WKX-613

Final Price: 12000.00 EUR
